

# COLLABORATE 10 RECAP

Tamer Chavusholu,  
Enterprise Solutions Practice  
**Kaygen**

## Highlights

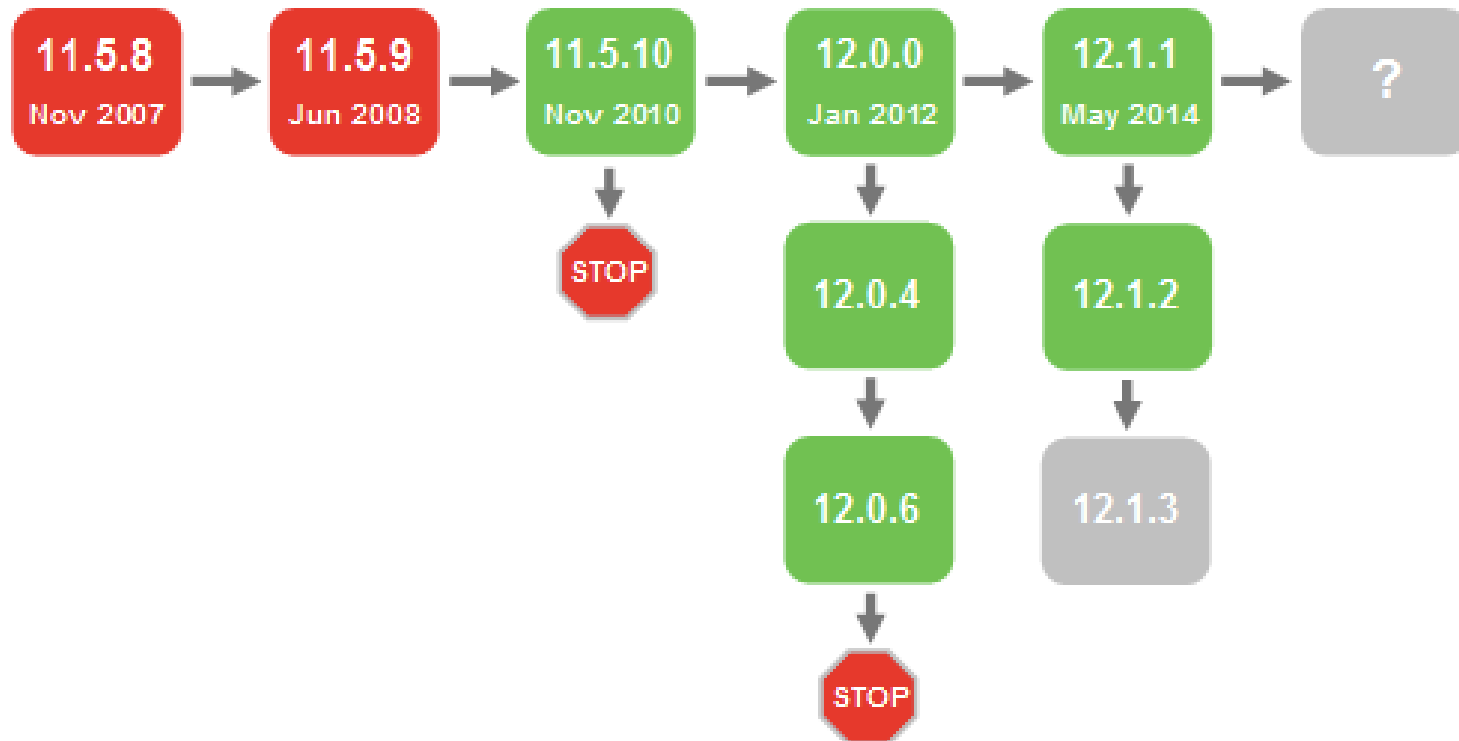

<http://oaug.collaborate10.com/wrap/>

- R12 Upgrade \*\*\*
- Fusion Apps
- MDM
- Networking Opportunities
- Looking forward to Orlando –  
COLLABORATE 11

## **Release 12 Reimplement vs. Upgrade Panel by Barbara Matthews**

- *What are the main decision points for upgrading versus reimplementing?*
- *Are there any lessons learned from upgrading?*
- *How do customizations impact the decision to reimplement or upgrade?*
- *Should we do R12 upgrade or wait for the Fusion Applications?*

Steven Chan's blog [E-Business Suite Upgrade Roadmap](#)

## Other Upgrade Pearls

- *Are there any recommendations for preparing for a Release 11.5.10.2 upgrade to Release 12.1.2?*
- See Sandra Vucinic's presentation, [Get Ready for EBS Release 12.1! Tasks to Complete Now to Ease R12.1 Upgrade Process](#). Here's a list of tasks from her presentation:
  - Upgrade database to 11gR1 or 11gR2
  - Convert tablespaces to OATM model
  - Evaluate impact of R12.1 on customizations and extensions
  - Introduce BI (XML) Publisher and JDeveloper
  - Introduce Web ADI and Report Manager
  - Archive and purge EBS 11*i* data
  - Convert from JInitiator to Native Sun JRE - `_21` is recommended
  - Integrate Discoverer Server Release 10g with EBS 11*i* - **use Discoverer 11g if possible** as Discoverer 10g is desupported at the end of 2010
  - Configure Oracle iAS Release 10g for external apps (SSO, OID, Portal) and integrate with EBS 11*i*
  - Position for high availability and scalability
  - Evaluate and complete platform change based on ROI
